

# PAVAI COLLEGE OF TECHNOLOGY

Dear Parents,  
Greetings from Paavai

Coming together is a beginning  
Keeping together is progress  
Working together is success

- Henry Ford

I am delighted to stay connected with you through this Newsletter 2012-2013 which contains the details about the activities carried out in the said academic year. At the same time I wish to share with you a few pertinent facts with regard to quality engineering education. It is true that the societal challenges of the twenty first century are very profound and wide –ranging. Basic

needs have become more acute as the world population exceeds nine billion. The demands for sustainable development have become the need of the hour necessitating the introduction of innovative engineering talent and leadership skills in myriad fields because what worked in the past is not going to guarantee success in the present. So engineers of today require a different set of arrows in their quivers. There are many young men and women engineers ready to contribute and make a difference. What better way is there to do so than through engineering which entails creation and innovation in the physical world? It is said that creativity is thinking up new things and innovation is doing new things.

Creativity and Innovation are increasingly being seen as the sacred mantras of Paavai Institutions. Whenever I happen to read about innovative ideas such as the AgroBot, a robotic machinery prototype for harvesting fruits, the 3D printing Adaptive technology, Nanostructured solar cells, the online electric vehicle, Foldable micro electric car, the RollTop, a flexible notebook concept, Brain for Robots, the Balloon- powered Internet for everyone, a project developed by Google etc., I am confident that the prospective engineers and technocrats of Paavai Institutions would also generate new scientific ideas, processes and solutions. I am sure every one of you would convert knowledge into social good and economic wealth through the process of innovation.

The number of educational and personality grooming programs that were being organized through your respective clubs and associations ensure that the launching stage is over and you are now journeying into the orbit to reach the targeted space. Some of you have already become student Partners of the Microsoft Innovation Centre and the list of worthwhile apps developed both by staff and students through Wipro, Mission 10X and iSpark center affirm the culture of innovative research and development on Paavai campus.

Paavai is built on a foundation of great intentions. To realize our institutional goal and to build a strong nation, we need to be innovative. It is not enough if we merely innovate, we must ensure that the deserving innovations are taken up by industrial houses and technological firms for further development, patenting and commercialization.

Let the latent fire in the heart of every engineer acquire wings and the glory of this great country light up the sky for which I wholeheartedly seek your continuous support and constant encouragement.

I wish you success in your forthcoming endeavors.
